

## E.COOLINE Powercool SX3 Outdoor Coolbag

### PRODUCT DESCRIPTION

The E.COOLINE Powercool SX3 Outdoor Coolbag keeps bottles, candy bars or daily small items such as medications cooler when traveling in high temperatures as a bottle cooler, hiking cooler bag or cooler bag:

- consists of a 3 D system with smart fibers, which by activation with water causes a temperature-dependent significant cooling effect up to 660 watts,
- cools as needed and according to the outside temperature with a physiological temperature of up to 12°C (no ice temperatures).
- has an elastic band for individual opening and closing and fastening.

### PRODUCT BENEFITS

- Fastest activation without preparation (saving of working time)
- Dry inside and outside, pleasant surface instead of hours of humidity/wetness
- Washability (machine) with detergent and thus hygienic application
- 100% climate-neutral product and technology Made in Germany
- Can be secured to bags or backpacks. Ideal for outdoors or on the road

- Storage: in a dry place with air exchange.

Please note the instructions attached to the product!

Article number 27105650

HS-Number 42029298

Size (unisex) one size

### Packing

Outdoor Coolbag per piece packed in plastic bag with zipper and instructions.

### TECHNOLOGY

### TECHNICAL DATA

The 3D- high-tech fleece made of polyester is able to store 1-2 liters/m2 of water. There is no condensation and no water drops when properly activated when worn.

The contained water cannot be squeezed out, it escapes only by evaporation, physically producing evaporative cooling. Due to the large surface area of the 3D fleece, this effect is significantly higher than with other materials.

In the field of medical applications, the product has CE Class 1 certification in Europe.

- outer fabric: Oekotex 100
- sizes: one size, bottles up to 1.5 liters
- colors: blau (Farb-Nr. 100)
- 2 layer material: outer material: 100% Polyester, core material: 100% COOLINE ®Polyester
- outer fabric antibacterial due to DEOXX fresh (natural silver ions, complies with BPR EU Regulation No. 528/2012) for hygienic reasons
- siliconfree version
