

SPINUP TOUGH(SMN-631V)

Development Story

We set out to create the lightest safety shoes without compromising on their signature durability and safety. By actively utilizing Cordura fabric—known as one of the strongest materials relative to its weight—and incorporating a reinforced plastic toe cap and rubber patches, this product achieves extreme weight reduction.

Features

- Ultra-lightweight safety shoes weighing 450g (based on size 265mm)
- Made with water-repellent Cordura fabric for wear in snow and rain
- Equipped with a polycarbonate toecap for excellent weight balance
- Dial fastening system for quick engagement of the shoe with users
- Rubber patches on the front and back for superior abrasion resistance
- Flexible bulletproof fiber midsole for outstanding comfort
- Wide reflective sheet on the heel for high nighttime visibility
- Super-grip outsole with enhanced traction optimized for outdoor environments
- Closed-cell insole for superior and long-lasting cushioning

Material

- Upper: Synthetic Leather and Mesh
- Midsole: Phylon
- Outsole: Rubber
- Dial Lacing: Insulated Steel Wire
- Color: Black
- Size: 235mm – 295mm
- Type: Cementing Safety Boot
