

SPINUP LIGHT (SMC-431V)

Development Story

This is an improved 4-inch version of the Spinup Tough safety shoes, renowned for their ultra-lightweight design. Optimized for indoor use, the product focuses on enhanced breathability. It features injection unit technology that integrates the midsole and outsole into a single structure, allowing the shoe to conform to the wearer's foot shape during actual walking, providing excellent comfort.

Features

- Injection Unit outsole for light weight and comfort
- Optimized wire path design for easy and secure fit
- Ultra-lightweight safety shoes at 400g (based on 265mm)
- Excellent ventilation with large side mesh panels
- Polycarbonate toe cap for superior weight balance
- Convenient and durable SPINON dial fastening system
- Highly abrasion-resistant rubber patches on the front and rear
- Flexible bulletproof fiber midsole for excellent comfort
- Phylon midsole for perfect weight balance and enhanced cushioning
- Closed-cell insole for superior and long-lasting cushioning

Material
